

Skills for Care and Development has developed a range of products to support professionals working with children and young people in England

The Child Protection app is intended to support those professionals who come into contact with children, young people and their families during their work. It's main purpose is to inform and educate professionals who are concerned about a child's immediate safety

The Schemas app explores patterns of repeated behaviour in children and provides practitioners with an evaluation tool to help understand and identify which schemas a child is displaying

The Professional Capabilities Framework (PCF) app is an overarching professional standards framework which applies to all social workers in England in all roles and settings

The above Apps are available to download now at:  
<http://www.childprotectionapp.co.uk>  
and via itunes and Google Play

Ambassadors for Careers with Children and Young People is a new service which aims to improve awareness of care as a rewarding, long term career and so to inspire a new generation to work in our sector

Further information is available at :

A QUESTION OF CARE:  
*A career for YOU?*

A Question of Care is a free online resource that helps job seekers find out about work in the care sector. The video-based challenge produces a personal profile for each enquirer, measuring the attitudes employers need.

Take the challenge at [www.aquestionofcare.org.uk](http://www.aquestionofcare.org.uk)

These products have been co-developed with the children and young people's workforce in England and received co-investment from the UK Commission for Employment and Skills through the Employer Investment Fund.
